

Linux Special Interest Group (SIG)

Dayton Microcomputer Association Meetup

The Dayton Linux Users Group, a Special Interest Group (SIG) of the Dayton Microcomputer Association, meets the 3rd Thursday of the month at Wright State University.

At our monthly [meetings](#), we may have one or more presentation topics planned, or we simply discuss news and projects of interest to our members. (We're working on planning presentations for more of our meetings, and could use some volunteers – hint, hint!). Our attendees include anyone from experienced Linux system administrators to those who have been hearing about Linux and want to learn more.

Since we are guests of Wright State University, the building and room for our meetings change. See our website www.dma1.org/linux/ before venturing out. The address for our mailing list is available at the same page.

You may park in the visitor parking lot in front of the Student Union. Enter Wright State at University BLVD and Col. Glenn and turn at the first right. Park elsewhere at your own risk.

We also have a after meeting meeting at a local restaurant. We usually pick Milano's on North Fairfield Road in

Beavercreek.

Dayton, OH 45400 – USA
